Dear Colleague:

We are excited to be conducting a national search for a new position as Director of Pharmacogenomics and Henry Rutgers Professor of Pharmacogenomics, a senior faculty position at Rutgers Biomedical & Health Sciences (RBHS) of Rutgers, The State University of New Jersey.

As New Jersey's academic health center, RBHS takes an integrated approach to educating students, providing clinical care, and conducting research, all with the goal of improving human health. Aligned with Rutgers University–New Brunswick and collaborating university wide, RBHS includes eight schools, a behavioral health network, and five centers and institutes that focus on cancer treatment and research, neuroscience, advanced biotechnology and medicine, environmental and occupational health, and health care policy and aging research. Through this community of healers, scientist and scholars, Rutgers is equipped as never before to transform lives.

The Director of Pharmacogenomics will develop and lead a university-wide pharmacogenomics program, and establish a unique and leading niche for Rutgers as a recognized pharmacogenomics leader.

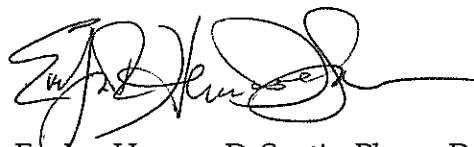

We are seeking candidates who have substantial leadership experience; a strong track record of success in funded research; demonstrated effectiveness as an administrator; an appreciation of the teaching mission; and a history of working across and integrating with multiple schools and programs.

If this position is of interest to you, please send us your current resume via our confidential associate, Lisa Mulé at lisa.mule@pharmacy.rutgers.edu and we will review. If this opportunity might be of interest to your contacts, please feel free to share the information with them. Any assistance you can provide in terms of referrals for this position would be greatly appreciated and at your request, will be kept confidential.

Regards,

Joseph A. Barone, Pharm.D., FCCP
Dean and Professor II

Evelyn Hermes-DeSantis, Pharm.D.
Clinical Professor I
